

Mastering English for Professionals

- In many jobs/professions, you must have complete control of English to advance
- I have created a database that includes all aspects of English grammar and vocabulary, especially idioms and verb phrases. These are the two areas you must learn if you are to speak English in a professional setting.
- From this database I can create a course that includes all the grammar and vocabulary that you will find most helpful.
- If you send me your goals in English, I can create a sample lesson and an outline of the course. Remember, goals can include listening, speaking, reading, and writing.
